

## Mohammad Khaldi

I have moved to Wichita from the Middle East in 1992. I've earned my Ph.D. in Electrical Engineering from WSU in 1997. I've been working at Textron Aviation since 1997 and I currently hold the title of an Engineering Specialist working in the Flight Simulation and Systems Test group. I'm married to Dana Malhis and have three daughter; Rhund, Jude and Meera. I served as a Board of Education (BOE) Member at the ISW from 2004-2008 involved with the Annoor Islamic School development and activities.

If I have the chance to serve in the Board of Trustees (BOT), I will deal with our community's members and matters with integrity and honesty to the best of my abilities and knowledge. I will always listen first then contemplate to make a decision.

I believe in:

- a. Being patient.
- b. Working smart –sometimes working hard-.
- c. Organization and putting detailed planes for any matter in life big or small.
- d. Honesty as the best strategy -look for facts without being emotional-.
- e. Not giving up.

I served as a Board of Education (BOE) Member at the ISW from 2004-2008 involved with the Annoor Islamic School development and activities. I would like for both Islamic Society of Wichita and Annoor Islamic School, to stay functional and strong to serve our community's needs.

My quick thoughts with regard to our community challenges are to reduce ISW spending and increase ISW income, need to pay competitive salaries to attract talent. I support having investments to reduce relying on donations for our operation.
